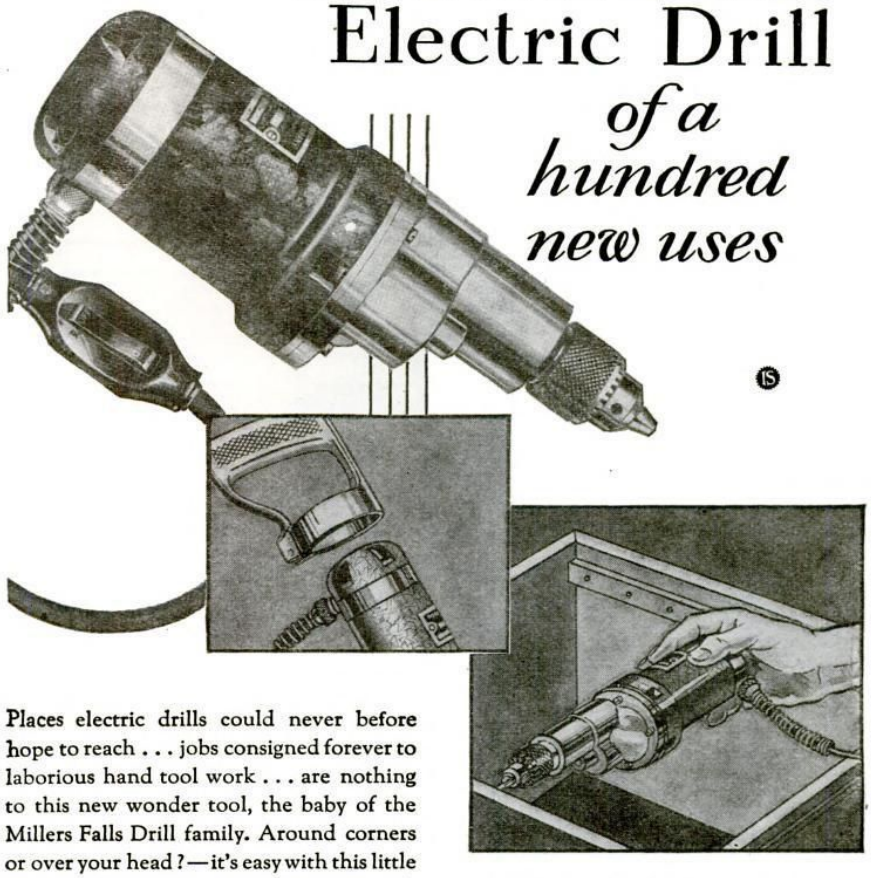
Here's *the* EXTRA SMALL Electric Drill *of a hundred new uses*



Places electric drills could never before hope to reach . . . jobs consigned forever to laborious hand tool work . . . are nothing to this new wonder tool, the baby of the Millers Falls Drill family. Around corners or over your head?—it's easy with this little power tool. It weighs only about 3 pounds —snuggles into your hand like a well-balanced screw driver. Into tight places and so-called inaccessible spots? — why this handy drill is only 9⅜" overall.

And yet this Millers Falls 3/16" Drill will turn out matchless performance. The ball-bearing motor develops ample power. The motor housing is made of "Racolite," a very strong moulded compound, a non-conductor of heat and electricity. It develops a no-load speed of 3,000 R. P. M. although it will be furnished with 2,000 or 1,200 R. P. M. at no extra cost. The price of $36.00 includes an auxiliary handle which can be clamped over the end of the housing.

Write now for additional information on this new power tool. Use the coupon below. Don't forget either that Millers Falls makes a complete line of electric tools — Drills from 3/16" to 7/8", Screw Drivers, Hammers, Grinders (both pedestal and bench), Disc-Sander, Portable Grinder. Electric Tool Catalog No. 2 contains complete descriptions and specifications. Millers Falls Company, Millers Falls, Mass. New York: 28 Warren St., Chicago: 9 So. Clinton St. Cable address: MILLERFALL NEW YORK
